

# The EJP RD Website

The EJP RD website is up and running though still under construction.

It is composed by various categories, one for each Pillar, followed by 20 subcategories, one for each Work Package.

The website is the gateway to the programme, therefore the visitors have a quick access directly from the home page to the important content such as funding opportunities, recent news and the upcoming events.

For even more straight-forward visibility, we have implemented a slider that displays all the important news and/or content that are available on the website.

The left-side menu allows access to each of the WPs, About us information and detailed information that may be divided in sub-categories whenever needed.

The website is mobile-friendly and in responsive design.
